

HOOF BIOTINE

INTENSIVE NEEDS OF THE HOOF

Description

Hoof care is part of initial training for riders. While «external» care is important, the quality of the hoof can be significantly improved by nutritional management, the objective of which is faster and more solid horn growth.

Purpose

HOOF BIOTINE is a mineral feed formulated by AUDEVARD Laboratories. It is designed to provide horses with nutritional support for their hoof horn and coat, as well as their mane and tail hair.

Formula

HOOF BIOTINE has been the biotin gold standard with veterinary surgeons for more than 20 years, as it provides not only 20 mg of D-biotin per day, but 14 essential micronutrients and a complex of four carefully selected plant extracts.

Our advice

Tell your customers about HOOF BIOTINE's biotin concentration (20 mg per measure) and comprehensive formula.

Daily allowance

1 measure= 25g.
Give 1 measure per horse, per day.

Professional Format

1 kg box - (EAN 3401175656332). Sufficient for up to 40 days' use in adult horses.
5 kg box - (EAN 3515652622625). Sufficient for up to 200 days' use in adult horses.
12 kg barrel - (EAN 3401177964626). Sufficient for up to 480 days' (16 months') use in adult horses.

Composition for 1 kg

Additives (per kg):

- **2b Flavouring substances:** 2b17019 L-proline 1,250 mg, apple flavouring 10,000 mg
- **3a Vitamins, pro-vitamins and substances with a similar effect:** : 3a300 vitamin C 5,000 mg, 3a314 niacin 5,000 mg, 3a841 pantothenic acid 4,000 mg, 3a316 folic acid 1,500 mg, 3a890 choline (chloride) 1,250 mg, 3a880 biotin 800 mg, 3a672a vitamin A 500,000 IU.
- **3b Trace elements:** zinc (3b603 oxide and 3b607 chelate) 39 732 mg, E1 iron (ferric oxide) 6,600 mg, copper (3b413 chelate and 3b405 sulphate) 3,108 mg.
- **3c Amino acids and salts, and similar products:** 3c301 DL-methionine 120,000 mg, 3c361 L-arginine 60,000 mg, 3c391 L-cystine 30,000 mg, 3c401 L-tyrosine 1,500 mg

Raw materials :

Dicalcium phosphate, calcium carbonate, barley, sugar beet molasses, magnesium sulphate, ginkgo (*Ginkgo biloba*), carob, sodium sulphate, chrysanthellum (*Chrysanthellum americanum*), methylsulfonylmethane (MSM), sulphurflower buckwheat, anise (*Pimpinella anisum*), hawthorn (*Crataegus oxyacantha*).

Analytical constituents:

Moisture < 10%, raw ash 42%, calcium 12%, sodium 0.96%, phosphorus 4%, magnesium 1%.

This product belongs to the mineral feed for horses category
