

Helping all people live healthy lives

Who else has your tourniquet been with?

Single-Use is Safer-Use

BD Vacutainer® **STRETCH** Latex-Free Tourniquet

- ✓ If you are currently re-using tourniquets, you may want to reconsider. Research shows that re-used tourniquets are frequently contaminated with blood.* Also, using a latex tourniquet may be putting your patients at risk, because as many as 17 million Americans are allergic to latex.*
- ✓ Let BD help. By adopting a single-use BD Vacutainer® Stretch Latex-Free Tourniquet, you will not only reduce the danger of cross-contamination between patients, but you will also safeguard both you and your patients from potentially dangerous allergens.

The BD Vacutainer® Stretch Latex-Free Tourniquet is compact and fits conveniently on your phlebotomy tray, and the perforated design allows for easy, one-at-a-time dispensing that facilitates a single-use policy.
