

Embrace comfort & freedom!

Would you wear a cone? Probably not! Sounds are amplified, it restricts movement, dogs and cats will bump into furniture and wounds stay unprotected. This often results in more stress. Do you prefer comfort, freedom and a faster recovery for your pet?

Go for the animal-friendly alternatives! The Recovery Suit & Recovery Sleeve from Suitical:

- Offers protection for wounds, skin problems, hot spots, when in heat and much more;
- Wounds stay clean, dry and the recovery is comfortable;
- Dogs and cats can move freely in their environment. No more bumping into walls and furniture;
- Unlike the cone, Suitical products also offers external protection. For example, think of children or other animals who want to play with or cuddle your dog or cat;
- No blood or urine stains and no wound fluids on the couch in your home or in the back seat of the car;
- All products are specially developed for the anatomy of dogs and cats;
- All products are reusable and machine washable up to 60°C / 90°C (140°F / 194°F);
- And more importantly: Suitical is 100% animal-friendly and free of lead and toxins!

Give dogs and cats the recovery they deserve with comfortable and protective products from Suitical. Less stress for a faster recovery!

Welcome to the No-Cone & Cooling zone!

So, let's take a look at the Recovery Suit®, Recovery Sleeve® and the DRY® Cooling Vest!

2019 EN v02

Suitical International B.V. | www.suitical.com | info@suitical.com

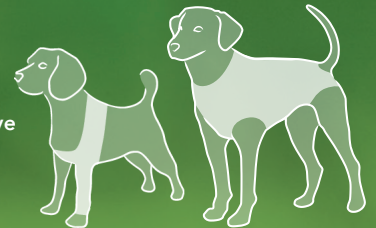

Recovery Suit & Sleeve - Dog

Protects wounds, skin problems, sutures, allergies and much more...

Because the Recovery Suit covers the entire torso, it prevents a dog from licking, scratching or biting wounds, ointments or irritated skin. The Recovery Sleeve is a front leg protection, ideal when there are problems with one of the front legs. Let dogs recover in complete freedom!

- The Suit can be opened at the rear end for a walk outside. Simply roll the Suit up and secure it with the hold-up system. Tip: view the video tutorial on www.suitical.com
- The Sleeve can be used for both the left and right front leg. The Recovery Sleeve can add pressure to the chest. As a result, dogs often experience less stress. Better for owner and the dog

- 🐾 The Suit and Sleeve can be worn at the same time if necessary. Always supervise your pet.
- 🐾 How to use? Available sizes? Detailed information about all products? Visit our website: www.suitical.com/products/.

Suit - Cat

Reduce stress and discomfort; this contributes to a faster recovery.

Because the Recovery Suit feels like a second skin, the cat will experience less stress and will retain its freedom to recover, eat, drink and play. Due to the specially enlarged opening under the tail, the majority of cats can keep the Suit completely closed while using the litter box.

- The Recovery Suit can even protect ointments and medicines when having problems with excessive licking and with overgrooming to reduce hairballs.
- For a cat it becomes almost impossible to open the Recovery Suit, because the closure is at the rear end near the base of the tail. The snug fit also makes it difficult for the cat to wiggle itself out of the suit.

- 🐾 Some cats need time to get used to the Recovery Suit. Always supervise your cat.
- 🐾 How to use? Available sizes? Detailed information about all products? Visit our website: www.suitical.com/products/.

DRY® Cooling Vest - Dogs

Keep your dog's body responsibly cool, wherever you are!

Hot weather? Hiking? Travelling? Dogs have no sweat glands and pant to cool themselves down as much as possible. Help your dog when the temperature inside and outside starts to rise and prevent overheating with the DRY® Cooling Vest by Suitical!

- The cooling vest is 100% dry, so your dog's furry coat will not start to smell like a wet vest. Unlike a cooling pad, you and your dog are not restricted to one place for cooling, because your dog is wearing the vest!
- The DRY® Cooling Vest is ready for use in 1 minute. Fill the vest with a small amount of water and your dog is immediately cooled to 59°F / 15°C below ambient air temperature for 1 - 3 days. In addition, the cooling vest can be refilled up to 800 times!

- 🐾 Always supervise your dog. Never leave an animal unattended in a car.
- 🐾 Visit our website www.suitical.com and read more about how to use, available sizes and detailed information about the DRY® Cooling Vest.
