

Oxygen concentrator AXAVET OLV-10S

Code ZMC024

The AXAVET oxygen concentrator model OLV-10S has been designed to meet the needs of veterinary centres requiring oxygen supply for anaesthesia, oxygen therapy and nebulisation. This device extracts ambient air, filters out nitrogen and other gases, and delivers high purity oxygen directly to the user through a nasal cannula or mask.

Its output pressure is higher than most concentrators on the market, allowing it to efficiently deliver oxygen to all makes and models of anaesthesia machines.

- Fully automatic and easy to operate
- Compact and quiet
- Requires very little space
- With power failure alarm
- Includes nebuliser cup
- Easy to maintain

Code	ZMC024
Model	OLV-10S
Flow range	0-10 l/min
Oxygen purity	93 % \pm 3 %
Output pressure	140 kPa
Noise level	50 dB(A)
Noise level of the alarm signal	>40 dB(A)
Energy consumption	800 W
Power supply	100-240 V AC, 50/60 Hz
Dimensions (LxWxH)	350x250x670 mm
Weight	28 Kg
