

EKYFLEX ARTHRO^{EVO}

TRIPLE PROTECTION OF THE JOINTS

Description

Ekyflex Arthro EVO : The evolution of joint protection

Concentrated and complementary ingredients for comprehensive support of the joint: cartilage, synovial fluid and subchondral bone.

New chondroprotective formula with a new generation ingredients of non-animal origin:

- Plant-based glucosamine
- Phytosterols from avocado and soy unsaponifiables (ASU)
- Proanthocyanidins (PAC) from grape seed extract and grape skin
- Peptagen II®: mix of collagen precursor amino acids specially adapted for horses and with no animal origin
- MSM: DMSO metabolite

- 10 g of glucosamine sulfate
- 4,5 g of MSM
- 1 g of ASU
- 3 g of Peptagen II®
- 1 g of PAC

30g

New formula

Purpose:

Complementary feed designed for joint protection and comfort.

Daily allowance:

• **Support dose** : 1 measure once a day during periods of competition, intense activity or for 1 to 2 months before an event. The dose can be doubled on the advice of your veterinarian.

• **Maintenance dose**: 1 half-measure during non-intensive periods.

For a pony, divide the measures by 2; support: 1/2 dose, maintenance: 1/4 dose.

1 dose = 30g

Professional format:

450g box – (EAN 3515650002801). Sufficient for up to 15 days use in support dose.

900g box – (EAN 3515650002818). Sufficient for up to 30 days use in support dose.

1,8kg box – (EAN 3515650002825). Sufficient for up to 60 days use in support dose.

4,5kg box – (EAN 3515650002832). Sufficient for up to 150 days use in support dose.

12kg box – (EAN 3515650002849). Sufficient for up to 400 days use in support dose.

New size

Composition for 1kg

Additives (kg):

- **2b- Aromatic substances**: 2b485 grape seed and skin extract (Vitis vinifera) standardised in PAC (>60% proanthocyanidins) 33,300 mg, Peptagen II® (2b17034 glycine 47,000 mg, 2b17019 L-proline 31,000 mg, 2b17002 L-alanine 15,000 mg), apple aroma 25,000 mg, stevia extract (CoE552) 5,000 mg.
- **3c- Amino acids and salts, and similar products**: Peptagen II® (3c361 L-arginine 7,000 mg).

Raw materials:

Glucosamine sulphate 2KCl (non-animal origin) 333,000 mg, alfalfa, lithothamnion, MSM (methyl sulfonyl methane), ASU (avocado/soybean unsaponifiables) 33,300 mg standardised to >30% phytosterols, carob, corn by-product, sugar beet molasses.

Analytical constituents:

Humidity < 10%, crude proteins 23.6%, crude cellulose 4.1%, crude fats 1.8%, crude ash 26.4%, calcium 6%, sodium 0.87%.

This product belongs to the complementary feed for horses category.
