

EKYRENAL+

STIMULATES HEPATO-RENAL FUNCTION

■ Description

Metabolism and strenuous activity produce waste (lactic acid, ammonia, etc.), the accumulation of which may be harmful to the horse's organism.

Waste and toxins are eliminated by the liver and kidneys, two vital complementary organs.

If they lose even a small proportion of their operating capacity, the functioning of the organism is disrupted and recovery after exercise is slower.

Specific nutritional support that targets the kidneys and liver is therefore particularly recommended in the case of chronic renal and/or hepatic insufficiency.

It is also very useful during the recovery period after intense physical effort.

■ Purpose

EKYRENAL+ is a dietary supplement formulated by Laboratoires AUDEVARD. EKYRENAL+ has been designed to meet the elimination requirements of horses, and is particularly suitable for supporting renal and hepatic function in the case of chronic renal and/or hepatic insufficiency. EKYRENAL+ is also recommended after strenuous activity and may be used when the ration is very rich, during changes of season (spring and autumn), for convalescing horses, etc. and also for elderly horses.

■ Formula

EKYRENAL+ provides specific nutrients, with carefully selected plants such as milk thistle, dandelion and prickly pear, and also choline and methionine. Horses love the apricot flavour.

■ Our advice

For horses who find it difficult to recover, you can recommend that they prepare for muscular effort with MYOSTEM PROTEC (whose formula is rich in antioxidants), and be given EKYRENAL+ after strenuous activity to meet their increased elimination requirements.

■ Daily allowance

Daily allowance: 25 ml 1-2 times a day, according to the horse's requirements.

Duration of use: between 1 week (recovery) and 6 months (chronic insufficiency).

In the case of an important sporting event, it is recommended to start giving EKYRENAL+ 3 days in advance, and to continue for 7 days after.

It is recommended that veterinary advice be sought before use or before extending the period of use. Shake well before use. Ensure water is always available.

■ Available formats

1 L bottle - (EAN 3515650900909) - Sufficient for up to 40 days' use in adult horses.

5 L container - (EAN 3515650910915) with 30-ml metering pump - Sufficient for up to 200 days' use in adult horses. Store at ambient temperature.

RECOVERY & ELIMINATION

Composition per litre

Additives (per litre):

- **2b- Aromatic substances:** dandelion (*Taraxacum officinale* - ext.) 33,000 mg, milk thistle (*Silybum marianum* - extract with 80 % silymarin) 23,100 mg, stevia extract CoE552 3,000 mg.
- **3a- Vitamins, provitamins and substances with analogous effect:** 3a890 choline 12,000 mg, 3a820 vitamin B1 3,300 mg.
- **3c- Amino acids and salts, and similar products:** 3c307 methionine 10,000 mg.
- **Technology :** apricot flavour 5,070 mg.

Raw materials :

Sorbitol, monopropylene glycol, prickly pear juice (*Opuntia ficus indica*), Pea protein, sodium salt of organic acids

Analytical constituents :

Humidity 88.6%, crude proteins 2.2%, crude fats 0%, crude ash 0.2%, crude fibre 0%, calcium 0%, magnesium 0%, phosphorus 0%, potassium 0.12%, sodium 0.03%.

Dietetic complementary feed for horses.
