

# VL ON90

ref. M46444900

ref. M46444900S (O-ring version)

PVC-free set for infusion of light sensitive drugs,  
light protecting, 15 µm filter

To infuse fluid bags or bottles with Volumat Agilia / Volumat MC Agilia infusion pumps.

## DESCRIPTION

1. Protective cap
2. Vented spike
3. Air inlet with antibacterial filter and air ventilation flap
4. Transparent drip chamber
5. 15 µm filter
6. Light protecting PVC-free (PUR) tubing: diameter 3 x 4.1 mm, length ~ 90 cm
7. Roller clamp
8. Green connector
9. Calibrated silicone pumping segment
10. Blue Safeclick: anti free-flow safety clamp
11. Light protecting PVC-free (PP-PUR) tubing: diameter 3 x 4.1 mm, length ~ 165 cm
12. Male luer lock
13. Protective cap

Approximate length: 285 cm

Approximate priming volume: 25 mL

Main materials: PUR, PP, silicone

**PVC-free, DEHP-free, latex-free**

## PACKAGING

- Case quantity: 30 units (6x5).
- Pallet of 1920 sets.

## TYPICAL APPLICATIONS

- Infusion of any drugs / fluids including light-sensitive drugs (including UV-sensitive drugs).
- Infusion of drugs / fluids
  - having no particular filtration requirements
  - available in bags or bottles
  - having no particular incompatibility.
- Infusion of drugs non compatible with PVC.

## NOT TO BE USED FOR / IN

- Blood cells.
- Automatic primary / secondary mode with Volumat MC Agilia.

## ADVANTAGES

- Protection of the drug against UV and visible light (250 nm - 350 nm).
- No loss of activity with PVC-sensitive drugs.
