

Triple action : tendon and ligament support

## Description

The primary characteristics of tendons and ligaments is an alliance of delicate fibres which have, under normal circumstances, great strength and elasticity. However, they are also subject to significant strain during exercise. In the event of a tendon injury, the challenge for veterinary surgeons is to encourage the formation of new tendon fibres rich in type-I collagen, which has unique strength and elasticity forming properties, so as to minimise the risk of relapse. These critical periods require specific nutritional support.

## Purpose

EKYFLEX TENDON EVO is a complementary feed formulated by AUDEVARD Laboratories. It is designed to provide nutritional support for horse's tendons and ligaments.

## Formula

EKYFLEX TENDON EVO's new formula allows **triple action** for horses' tendons and ligaments:

- **Create high quality collagen** (thanks to the Tendogen I® and White Willow)
- **Optimise the tendon and ligament environment** (thanks to Boswellia serrata and citrus, rich in flavonoids)
- **Consolidate the attachment of tendons and ligaments to the bone** (thanks to Vitamin D3)

## Our advice

EKYFLEX TENDON EVO can be used to support tendons and ligaments:

- when a horse is in work.
- during the recovery phase following a tendon injury.

## Daily allowance

• Support dose: 1 measure once a day during periods of competition, intense activity or for 1 to 2 months before an event. The dose can be doubled on the advice of your veterinarian.

• Maintenance dose: 1 half-measure during non-intensive periods.

For ponies, halve the dose: support ½ measure; maintenance ¼ measure.

1 measure = 30 g.

Contains Salicyline. During competitions, do not give more than 4 scoops per day.

## Formats

900g tub - (EAN 3515650880881). Sufficient for up to 30 days use in support dose.

1.8kg tub - (EAN 3515650000890). Sufficient for up to 60 days use in support dose.

## New formula

- 10g Tendogen I®
- 3g White Willow
- 6mg Citrus
- 650mg Boswellia Serrata
- 400mg Vitamin D3

30g

## Composition for 1 kg

### Additives:

- **2b- Flavouring substances:** Tendogen I® (2b17034 glycine 136,700 mg, 2b17019 L-proline 46,700 mg), white willow (*Salix alba* - standardized to 25% salicyline) 100,000 mg, apple aroma 25,000 mg, 2b2816-ex extract of olibanum (oleoresin of *Boswellia serrata* - standardized to 65% boswellic acid) 21,700 mg.
- **3a- Vitamins, pro-vitamins and substances with a similar effect:** 3a671 vitamin D3 100,000 IU.
- **3c- Amino acids, their salts and analogues:** Tendogen I® (3c322 L-lysine 110,000 mg, 3c370 L-valine 40,000 mg).

### Raw materials:

Alfalfa, lithothamnion, carob, sugar beet molasses, *Stevia Rebaudiana*, citrus extract (50% bioflavonoids) 13 300 mg.

### Analytical constituents:

Humidity <10%, crude protein 4.0%, crude fats 1.5%, crude ash 14.0%, crude fibre 4.0%, sodium 0.1%.

This product belongs to the complementary feed for horses category.
